EVENTS DIARY

programmes that we are working on to try to shape and enhance the ecosystem. A significant amount of our discussions are focused on defining and raising standards, across the key programmes that we operate. We are planning to release a series of new programmes throughout the next 12 months, and we expect the first of these to launch in July. We hope that these programmes will help buyers of cyber security services to identify suitably skilled and competent organisations to engage with. As a result, you can expect to see further updates to our accreditation process and our Skilled Persons Register throughout the quarter ahead.

Examinations are a major focus for CREST, and there are several updates taking place to certified level assessments. We have listened to the feedback from recent exam takers, and we are using this insight to shape and enhance the exam experience. We hope to be in a position to communicate more tangible details about the planned changes during Q3.

It was great to get out and meet many of you in recent events in the Middle East, at RSA and Infosec. We are delighted that so many people have registered for CRESTCon, and the CREST team looks forward to speaking to you in person, after so many months of virtual events, and virtual meetings. We thank all of our sponsors for helping to support CRESTCon, and we look forward to hearing many great talks and presentations that are scheduled to be delivered across the event.

Make sure you continue to follow us on LinkedIn, and keep an eye out for some email based member comms. We expect to announce a major new initiative in July, that is designed to improve security testing standards across the globe. It is exciting times, and with your support and engagement, CREST hopes to materially enhance cyber security standards across large swathes of the cyber security landscape.

Rowland Johnson, CREST President

President's Update

It was great to have an opportunity to engage with so many of you at our AGM in June. This provided a great platform for us to share a strategic update on our plans and aspirations for the next 24 months. There is a significant focus on increasing our member benefits, and the AGM provided a great opportunity to share some of the plans that we are working on to deliver additional value to members in all corners of the globe.

As most of you will recognise, cyber security never stands still and there are a huge number of initiatives and

NEWS:

Nick Benson, CREST CEO: Listening, learning, reflecting and planning

My first two months in role have been a great opportunity for me to listen to our members, get to know the cyber sector and start to plot out the future in more detail.

It was a particular pleasure to launch our new strategy, vision and mission to our membership over webinar in June. Feedback from the event has been very positive, with appreciation of the renewed vigour, ambition and focus that we presented. If you didn't attend, members can contact marketing@crest-approved.org for a recording of the presentation to hear about how CREST 3.0 will offer a significantly broadened and strengthened value proposition to members in the years to come.

Another highlight so far has been meeting so many of our dedicated council members who steer both the direction of CREST regionally and contribute to the overall direction of CREST internationally. The passion and enthusiasm are palpable. The central team and I will be spending much time over the coming months working out how we can do more to harness this and give the regions the tools, autonomy and support to make CREST even better in their local regions.

A useful reference point has also been the two overseas trips I have done so far with Rowland and Andy. We spent four days visiting three countries in the Middle East, including the signing of a Memorandum of Understanding with the Qatari National Cyber Security Agency (NCSA) (more information [here](#)). The visit highlighted the valuable role that both CREST and its members can play in accelerating the advancement of cyber capability in a country.

In contrast, we attended the RSA Conference in San Francisco, the largest cyber security conference in the world I am told. The scale was remarkable, as was the cutting-edge nature of the presentations and exhibitors. The US market provides huge opportunity for CREST member firms, and we are increasingly positive about the progress we can make there over the next 6-12 months, with the fantastic support of the Americas council.

In summary, I am left enthused and optimistic following my initial period of listening, learning and reflecting. The next stage is to convert that into an executable plan, which I look forward to sharing more about in my subsequent updates.

Exams

Andy Woolhead CREST Global Head of Product: Exam preparation and focused training

In line with CREST's new vision and mission to raise professional standards and provide capability, capacity and consistency across the global community, we are well underway with our partnerships with both Hack the Box and Immersive Labs to offer back some focused training aligned to the CREST certifications.

Mapping of content is well underway and we have now got a blueprint of what the offer might look like for our members. To manage expectations, we do not have a bottomless pit of funding to generate a solution which will provide 100% free training across all of the CREST certifications and in reality, not everyone learns in this way. What we will be able to provide is some focused training using practical labs across the two partners' platforms which will take individuals on the learning journey to better prepare for CREST certifications.

As we engage with candidates and members, one of the themes is exam preparation and it is something we have listened to and are focused on improving. We are in the process of reviewing exam content and to better align it to current practices and of course to better signpost candidates' preparation.

With Hack The Box, there is likely to be a pathway for each of the Penetration Testing Exams which will take an individual so far down the curriculum (distance tbc) to allow individuals the opportunity to touch and feel the labs and experientially develop and hone their skills in a particular area. Exclusive vouchers that will give periodic unrestricted access to all HTB content, including CREST Mapped content, will be allocated to Member organisations (numbers tbc) and once the free journey has been completed there will be an opportunity to purchase the full curriculum. CREST has secured and will also look to fund access to a limited number of exclusively created Dedicated Labs (numbers and distribution model tbc) with CREST-mapped content, with the ability to upgrade at a preferential discounted rate (more info will follow). Whilst we would love to fund the entire journey, we simply don't have the resource to fund it and hope that it complements an individuals' additional preparation.

For Immersive Labs there will be a similar but subtly different approach. Free access will be granted to CREST members aligned to a specific CREST pathway for the CTI and IR curriculum which will also include a number of

NEWS:

other labs outside the curriculum. The second offering, again funded by CREST will be a focused lab-based training programme for the more advanced courses and we still need to determine how much of the learning pathway we can fund but there is likely again to be an option to purchase the full suite.

I am certain there will be plenty of questions around how this the programme will ultimately look but I wanted to provide an update which colours in some of the detail we are discussing with both HTB and IL. We are aiming for an Autumn launch and whilst we will be making every effort to accelerate this, the devil is in the detail, and I hope to be able to provide some further updates as the process matures. Both HTB and IL have been incredibly forward leaning into the project and we remain as excited as we were at the start of the journey – More to follow!

Accreditation

*Jonathan Armstrong,
CREST Principal Accreditor*

The skilled person registration process has been live for just over two months now and thank you to the members who have already provided us with the names of the individuals they would like to register with CREST. Many of these individuals have already fully completed the process and have received their Unique CREST ID.

The additional information around the skills and competencies held within the teams responsible for delivering CREST Accredited services on behalf of members will be hugely beneficial in allowing members to display themselves in the best possible way to potential clients.

We plan to start implementing some of the additional information captured by the skilled person register into the buyer's journey on the website later this year.

We would encourage any member that has not already done so to start the process as soon as possible so that they can be included in this initial wave of implementation.

We have designed the registration to be as quick and simple as possible.

Members can start the process by accessing the Membership Application Portal and completing the Skilled Person Account Registration program. Further details are available here: <https://www.crest-approved.org/membership/registering-your-skilled-professionals/>

Website & Comms

*Alan Thomson, Communications
Manager: Benefits for updating your
website profile*

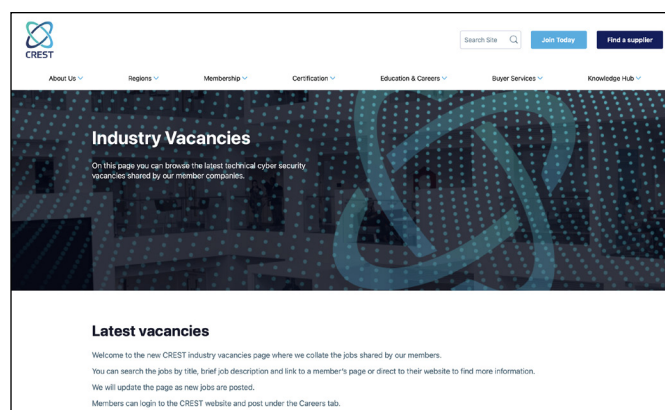

There is still time to stand a chance of winning some discounts and goodies by updating your profile on the CREST website.

Members have until 6pm (UK time) on 11 July to login and update their profiles on the website and be in with a chance to win prizes such as free examinations and a free exhibition stand at the next CRESTCon in their region*.

Members logging into the site can complete a range of tasks including:

- Updating your main company description
- Updating contact details
- Adding a new logo
- Adding a banner image
- Monitoring buyer contact forms and callback requests
- Linking to you latest job vacancies
- Linking to your events

Those uploading jobs to our website will feature on the new <https://www.crest-approved.org/education/industry-vacancies> page which collates and displays the jobs shared by members. This provides you with a free recruitment channel to drive traffic to your vacancies.

Potential candidates can browse by company, job title and brief job description. They can link to members' profile pages on the CREST site and/or link straight to members' websites to find out more about the opportunity and applying.

NEWS:

To update your profile simply login using your unique username and password and you will be taken straight to an editable version of your profile page. Here you can change the details listed above including posting links to vacancies on your website under the Careers tab.

Even if you miss out on the chance of prizes there are many reasons to regularly login and update your profile to keep your company pages up-to-date and present your business and services in the best light to buyers.

For further information on updating your member profile visit <https://www.crest-approved.org/making-sure-members-access-their-benefits-on-the-crest-website/> - Crest ([crest-approved.org](https://www.crest-approved.org))

Terms and Conditions

* The offer applies to companies who have updated their company profiles, including adding at least one job before 11 July, 2022. The three winners will be selected at random from the eligible members. Each of the winning members can choose from one of the following:

- Two free CREST examinations;
- A bronze exhibition stand at the next CRESTCon in the member's region (where applicable);
- An additional 5 free tickets at the next CRESTCon in the member's region (where applicable);
- A live webinar and/or podcast hosted and promoted by CREST (webinar content then hosted on demand on the CREST YouTube Channel).

Winners will also be sent a goodie bag of CREST branded items.

Exhibitions and events reviews

Infosecurity Europe 21-23 June 2022

CREST exhibited at Infosecurity Europe 2022, a three day exhibition on 21-23 June.

It is one of the largest technical security exhibitions and conferences in the UK and was held for the first time at the ExCeL in London. Unfortunately there was a train a tube strike which had a noticeable effect on the attendance on Tuesday and Thursday. However, Wednesday was very busy.

As well as a stand at the event, Rowland Johnson spoke on a panel for Infosecurity talking about skills gap, which was live streamed. A video of this will be available shortly. Rowland was also interviewed by various media outlets.

Andy Woolhead also did a filmed interview on the stand with the event's roving reporter about talking about CREST's skilled persons register, which you can watch here: <https://youtu.be/ysthOAKY80>

It was also good to get the opportunity to speak to so many CREST members at the event who were either exhibiting or visiting.

NEWS:

RSA review

Members of the CREST senior management team attended the RSA Conference in San Francisco in June where they met with members of the Americas Council, members and stakeholders.

Rowland Johnson, CREST President (third from right), Nick Benson, CEO (second from left) and Andy Woolhead, Head of Global Product (first on the left) were joined by Tom Brennan, Chair of the Americas Council (fourth from right), and members and stakeholders at a collaborative and productive dinner to discuss developments and opportunities in the sector.

During the four-day event, one of the biggest cyber security events in the world, the team also met member company representatives face-to-face and discussed the latest developments within CREST.

CyberUK, 10-11 May 2022

Cyber UK is NCSC's flagship exhibition and conference and this year was held in Wales, UK at the ICC, Newport.

Rowland Johnson, Nick Benson and Andy Woolhead attended from the CREST senior management team. We also welcomed Nigel Phair from CREST Australia to the event.

CREST had one of the larger stands and we managed to secure a prominent space. Jonathan Armstrong, Adriana Costa-McFadden and Debbie Jones looked after the stand over both days and ensured anyone who visited had their questions answered.

It was a great opportunity to showcase CREST's refreshed brand identity to the cyber security community in the UK in person for the first time.

It was also good to have the opportunity to talk face-to-face with members, government and regulators, as well as to potential new members and individuals wanting to take CREST certifications either for the first time or to renew. We also spoke to other professional bodies and academic institutions. The feedback from everyone was on the whole extremely positive.

Rowland Johnson spoke on 10 May at the Cyber UK Ecosystem zone.

NEWS:

CTIPs Networking Drinks, 9 June at the Coin Laundry, London

After the December 2021 event sadly having to be cancelled due to the pandemic, the first CTIPs drinks in 2022 at the Coin Laundry in London was really appreciated by all attendees. There were lots of interesting conversations and plenty of networking opportunities during the evening while everyone enjoyed a drink and some food. These events are a great opportunity for people who are working in CTI, starting their route into CTI or have broken into new CTI careers after a career change to have a good chat and interesting discussions with other people from the industry.

Pitch on the Ship – HQS Wellington, London, 16 June

CREST attended and exhibited at ISSA UK's Pitch on the Ship event on HQS Wellington in London, UK.

Vendors were given a 10-minute speaking slot to tell delegates about their products and along with the other speakers it made for a really interesting day. It was lovely weather, and it was great to network and have the food and drinks out on the deck.

Thank you to ISSA for inviting CREST to their event.

Helping the Next Generation of Cyber Experts in Singapore

Our thanks to Cecil Su from the CREST Asia Council and BDO Advisory for speaking at the Cyber Security Agency (CSA) Youth Cyber Exploration Programme (YCEP) event on the 23 of June 2022.

CREST had the great privilege of speaking to the next generation of cyber experts in Singapore at the Singapore Polytechnic (SP) School of Computing alongside Nathanael Hoe from the CSA and a speaker from Cyber Youth Singapore (CYS).

The CSTI Summit 2022 in Kuala Lumpur

Members of the CREST Asia Council John Lloyd and Ramesh Naidu represented CREST at the Cybersecurity & Threat Intelligence Summit on 21 & 22 June at the Pullman KLCC Hotel. The two-day conference in Kuala Lumpur was an excellent opportunity for the CREST Asia team to meet with the cybersecurity community and our members across Malaysia and the region. We thank CREST member companies Casaba Security and Vigilant Asia for supporting CREST at this event.

Americas Update

Tom Brennan, Chair of the Americas Council

The CREST Americas effort has been busy in the United States working with regulators and standards bodies for the benefit of global buyers and our member companies. On 8 June, the America's Council, many of whom joined from the RSA Conference in San Francisco (see the event write-up in this issue), held its quarterly meeting and describe its progress and plans. Membership in the Americas region has increased by almost 16 per cent on this time last year with three new members.

CREST regional task forces are prepared for active efforts in the third quarter, and we recommend all member

companies that wish to participate reach out to any member of the Americas Council to get involved.

You can find the contact details of the Americas Council on the **CREST website**.

Asia Update

Emil Tan, Chair of the Asia Council

It has been a busy few months for the CREST Asia Council, and many live events are now up and running.

Since the last edition of The Script, the CREST Asia team has attended Asia Tech x Singapore (ATxSG), the AiSP Innovation Summit, Black Hat Asia, and the Cyber Security Agency of Singapore (CSA)'s Youth Cyber Exploration Programme (YCEP). I am grateful to Cecil Su, from the CREST Asia Council and BDO Advisory, for speaking at the YCEP event on 23 June.

Thanks too to Asia Council members John Lloyd and Ramesh Naidu who represented CREST at the Cybersecurity & Threat Intelligence Summit (CSTI) in Kuala Lumpur in June. John spoke at the summit outlining CREST's role in driving standards and quality, through accreditation and certification. CREST also exhibited at the summit, with support from Faye Percival our regional marketing executive. We thank CREST member companies Casaba Security and Vigilant Asia for supporting CREST at this event.

It has been fantastic to get back out and meet our members and partners across the cybersecurity community. CREST Asia will also announce its own events for its members, and the buying and cybersecurity communities, in the coming months.

CREST is confirmed to participate in more events in Asia, including Cyber Security Asia 2022 at the Sheraton Imperial Hotel, Kuala Lumpur (15-16 August 2022) <https://cybersecurityasia.tech>

I will be chairing a panel discussion at this event titled: **Critical Infrastructure Security: Is change our greatest ally or just a painful exercise?**

CREST is also attending Hack In The Box (HITB) Singapore, GovWare 2022, the AiSP Cloud Security Summit and SINCON 2023. We look forward to seeing you there!

We are working closely with CREST's central teams to see our exams become available online, and we can now confirm that Red Alpha Cybersecurity is delivering CREST examinations in Singapore. Our thanks to the CREST Asia Council, which works closely with government, regulators and academia across the region to strengthen CREST's presence and support its members.

We look forward to a visit from the CREST Executive team later this year. You can find contact details for the Asia Council on the **CREST website**.

NEWS:

Australasia Update

Nigel Phair, Chair of the Australasia Council

The CREST Australasian Chapter welcomes the announcement by the new Albanese government of Clare O'Neil MP as the Minister for Cyber Security. The appointment of a cabinet level minister is important showing the new government is seeking to lift cyber-resilience across the whole nation. It's been a busy time for the Commonwealth Government who are dedicated to enhancing the security and resilience of Australia's critical infrastructure and systems of national significance with the passing of legislative reforms. This legislation enhances the partnership between industry and government to ensure Australia's social and economic stability. It gives specifics on Government's role in managing and intervening in cyber attacks while placing more accountability on organisations and enterprises to mitigate against them. The Chapter continues to work with the Australian Cyber Security Centre and the Cyber and Infrastructure Security Centre (CISC) to assist Australian critical infrastructure owners and operators to understand the risk environment and meet their regulatory requirements.

In April the Chapter held a very successful 2nd annual CRESTCon at the Hotel Realm, Canberra. All presentations have been uploaded to the CREST YouTube channel at - <https://www.youtube.com/crestadvocate>

The Chapter has also been holding exams, with strong interest in CREST Certified level qualifications. Please contact exambookings@crest-approved.org to book your exam.

The rest of 2022 promises to be just as busy with a training/information session in partnership with the CISC on cyber risk management at the AISA conference in October and member and regulator engagement events being scheduled for New Zealand in November.

You can find contact details for the Australasia Council on the [CREST website](#).

UK Update

Rob Dartnall, Chair of the UK Council

CREST UK continues to grow with new members and more certification holders.

Our Council also continues to evolve with, Ben Turner, Head of Advisory Services at Nettitude and Martin Walsham, Principal Consultant at AMR Cyber Security have been appointed to the UK Council at the recent AGM. I know them both well and I am delighted to welcome them both to the Council. They are both, driven and well-respected individuals in our community

and I look forward to working with them both. It was also great to see Oliver Church of Orpheus and Simon Clow of Context Information Security, who were standing for re-election and have already made valuable contributions over the past three years, be re-elected. Over the coming quarter we will be working hard and hand-in-hand with the CREST Operational Executive, other CREST Regional Councils, Focus Groups and Assessors looking at new exams, new ways to deliver those exams and their associated training; supporting the evolution of new frameworks and the creation of new ones. We will also be supporting CRESTCon on 13 July where we look forward to catching up with you all face-to-face. As ever, we are here for the members, if you need anything, please do get in contact with any of the UK Council members on the [CREST website](#).

CRESTCon UK 2022 is nearly here – don't forget to book your tickets!

After two long years we are excited for **CRESTCon UK** to be back in person at the **Royal College of Physicians** on Wednesday, 13 July 2022 and can't wait to be welcoming as many of you as possible. Running for over 10 years, CRESTCon is an important date in the industry calendar, with **four conference streams**, an exhibition, demo area, student room and an evening drinks and networking event. CREST members are entitled to two free member tickets and further tickets at 50% off. Please contact marketing@crest-approved.org to us know of the attendee's names you wish to register and we can give you a code for any further tickets you wish to purchase. There is also a chance to sponsor the event. So please contact either myself Debbie.jones@crest-approved.org or Heike.anderhub@crest-approved.org to explore opportunities

Tescom

Tescom is the largest independent provider of Software Quality Assurance (SQA) and Software Testing services in Singapore specializing in providing businesses with a comprehensive, outsourced approach to SDLC from inception to commissioning. We plan, design and execute solutions for businesses to ensure optimal performance, integration, usability and security of their IT systems and applications.

Hacker Academy

Hacker Academy Ltd provides services on cybersecurity with its expertise and diligence. The experience of our expert team includes various successful cybersecurity projects with finance sector companies such as Kroll Business Technology, Ecospend Technologies Limited and Heyman AI; Software Development companies such as Oak Smart Tech, Acorn Games, Alder Applications; and public bodies such as London Metropolitan Police.

We delivered hundreds of cybersecurity projects, including infrastructure, cloud, application on-site, and remote penetration tests for the top-level public bodies, telecom companies and fintech companies.

Besides, by leveraging their unique expertise, our instructors are training IT personnel to equip them with the tools vital for a qualified cybersecurity expert.

Pentest Cyber

We are a diverse group of highly experienced and accredited UK cyber personnel.

Our focus is on providing “result-driven” objective testing services beyond “auto-scans” to a discerning international audience.

We base our methods on our clients’ objectives of discovering and treating weaknesses in an effective non-disruptive manner using advanced techniques that delve deep while aiming to leave systems operational and unharmed.

We understand how global enterprises work and have deep experience “from micro to global” in a multitude of sectors; Banking & Finance, Legal, Military, Manufacturing, Travel, Hospitality, Education, Security, Retail and more.

If you need an intuitive, autonomous test team “vetted to a high government standard” who understand CABs, ISO 27001, ITIL, “follow the sun”, DCPP or the many other industry acronyms indicating specific security needs; then look no further.

We have been operating successfully since 2016, regarded as highly trusted with a client retention rate of over 90%.
